

CodeIT eMRB™

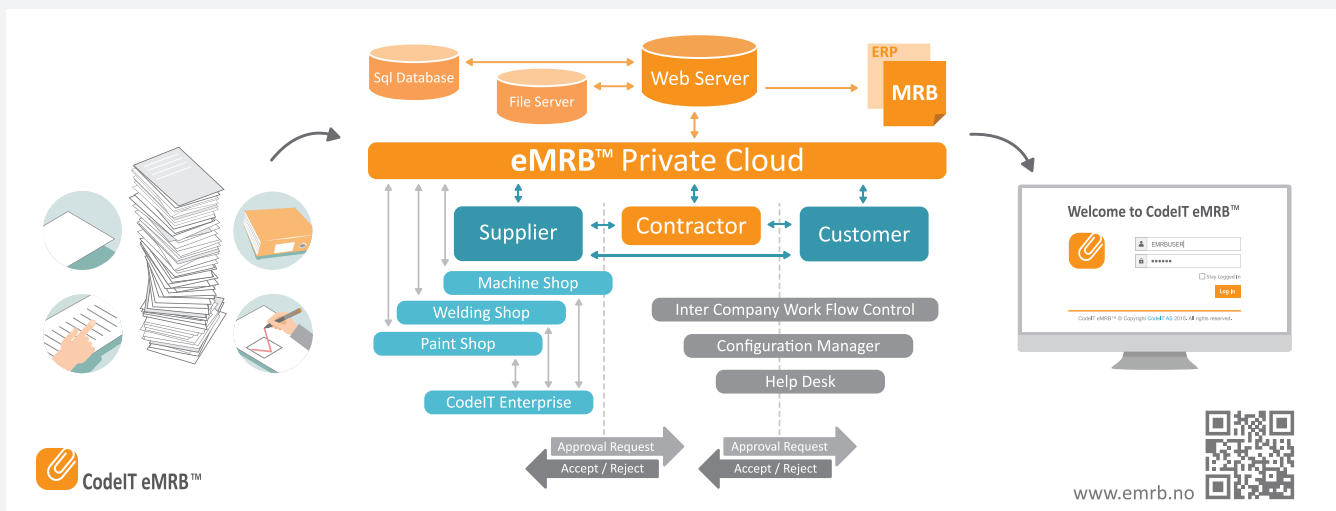

Manufacturing Record Book – MRB processing has never been simpler

CodeIT eMRB™ is an industry solution for MRB compilation. The solution indexes all relevant production order information quickly in a secure and manageable way.

CodeIT eMRB™

eMRB™ records documents, material information, welding data and control data in a database. As a final step, the complete MRB is generated according to the client's requirements. Correct recording is a key focus area, and data control may be partially automated.

CodeIT eMRB™ in the Cloud

CodeIT AS offers a secure and closed cloud solution for eMRB™. Our cloud solution services (Private Cloud) are produced and delivered in Norway. All data are secured according to Norwegian laws and regulations, and we offer extensive security, including two separate data center sites for redundant services.

- Data is recorded only once
- Data may be recorded where created
- High quality own data
- Strong focus on correct data entering
- Automatic consistency check to simplify final verification
- Simplified workflow where all parties has access to the same data
- Immediate view of progress and documentation status
- Significant savings with **CodeIT eMRB™**
